Essential Sexual Health Questions to Ask Adults

Ask all of your adult patients the sexual health questions on this card. They will help you assess the patient’s level of sexual risk and determine whether additional questions and which preventive services may be needed (other side of card).

1. What do you consider yourself to be?
   A. Lesbian, gay, or homosexual
   B. Straight or heterosexual
   C. Bisexual
   D. Other (please specify)
   E. Don’t know

2. What is your current gender identity?
   A. Male
   B. Female
   C. Female-to-male/transgender, male/trans man
   D. Male-to-female/transgender, female/trans woman
   E. Neither exclusively male nor female (e.g. genderqueer)
   F. Other (please specify)
   G. Decline to answer

3. What sex were you assigned at birth?
   A. Male
   B. Female
   C. Decline to answer

*If patient answered “both” to previous question, ask this question for each gender.

Has sex changed for you? If so, how?

Ask Older Adults

Ask at Least Annually

Have you been sexually active in the last year?

- YES
  - What are the gender(s) of the people with whom you are engaging in sexual activities?
  - In the past 12 months, how many sexual partners have you had?*

- NO
  - Have you ever been sexually active?
    - YES
      - What are the gender(s) of the people with whom you had sex?*
      - How many sexual partners have you had?*
    - NO
      - Continue with medical history

Ask at least once, and update as needed. Gender identity and sexual orientation can be fluid.

1. What do you consider yourself to be?
   - A. Lesbian, gay, or homosexual
   - B. Straight or heterosexual
   - C. Bisexual
   - D. Other (please specify)
   - E. Don’t know

2. What is your current gender identity?
   - A. Male
   - B. Female
   - C. Female-to-male/transgender, male/trans man
   - D. Male-to-female/transgender, female/trans woman
   - E. Neither exclusively male nor female (e.g. genderqueer)
   - F. Other (please specify)
   - G. Decline to answer

3. What sex were you assigned at birth?
   - A. Male
   - B. Female
   - C. Decline to answer

*If patient answered “both” to previous question, ask this question for each gender.

**a** = At increased risk: inconsistent condom use, multiple partners, partner with concurrent partners, current STI, or history of STI within a year

**b** = Aged 21 to 65 or when adequate screening history has been established

**c** = FTM transgender patients who still have a cervix according to guidelines for non-transgender women

**d** = Sexually-active women aged <25; women aged ≥25 at increased risk

**e** = Young adult males in high prevalence communities or settings

**f** = Screen for urethral infection if insertive anal sex in preceding year; rectal infection if receptive anal sex in preceding year

**g** = Screen for urethral infection if insertive anal sex in preceding year; rectal infection if receptive anal sex in preceding year; pharyngeal infection if receptive oral sex in preceding year

**h** = HIV-positive; at increased risk: exchange sex for drugs or money; in high prevalence communities

**i** = At risk: HIV-positive, unprotected sex, share needles, family member or sexual partner infected with HBV; born in a HBV-endemic country; born to parents from a HBV-endemic country

**j** = HIV-positive, history of injection or intranasal drug use or incantation; blood transfusion prior to 1992

**k** = Born between 1945 and 1965 (at least once)

**l** = Use illicit drugs; have chronic liver disease; receive clotting factors; travel to HAV-endemic countries; wish to be vaccinated

**m** = At risk: multiple partners, share needles, family member or sexual partner infected with HBV

**n** = Young adult women and men aged ≤26

### Essential Sexual Health Questions to Ask Adolescents

Ask all your adolescent patients the sexual health questions on this card. This will help you assess your patient’s level of sexual risk, and determine whether additional questions and which preventive services may be needed (other side of card).

#### Ask at Least Annually

1. What questions do you have about your body and/or sex?
2. Your body changes a lot during adolescence, and although this is normal, it can also be confusing. Some of my patients feel as though they’re more of a boy or a girl, or even something else, while their body changes in another way. How has this been for you?
3. Some patients your age are exploring new relationships. Who do you find yourself attracted to? (Or, you could ask, “How would you describe your sexual orientation?”)
4. Have you ever had sex with someone? By “sex,” I mean vaginal, oral, or anal sex. (If sexual activity has already been established, ask about sex in the past year.)

#### If the Adolescent Has Had Sex, Ask About

- Number of lifetime partners
- Number of partners in the past year
- The gender of those partners
- The types of sex (vaginal, oral, anal)
- Use of protection (condoms and contraception)
- Coercion or rape

#### Prepare for the Sexual History Interview

- Explain to a parent or caregiver that you spend a portion of each visit alone with the adolescent.
- Put your patient at ease. Ensure confidentiality except if the adolescent intends to inflict harm or reports being abused. Know your state’s laws that affect minor consent and patient confidentiality.
- Incorporate the four essential sexual health questions into a broader psychosocial history.
- Start with less threatening topics, such as school or activities, before progressing to more sensitive topics, such as drugs and sexuality.
- Use open-ended questions, rather than closed-ended, to better facilitate conversation.
- Listen for strengths and positive behaviors and for opportunities to give praise where praise is due.

If the Adolescent Identifies as Lesbian, Gay, Bisexual, Transgender, Questioning (LGBTQ)

- ✓ Ask whether they have a trusted adult to talk to.
- ✓ Assess safety at home and school and whether they are being bullied or harassed.
- ✓ Link your patient to community or national organizations such as [pflag.org](http://pflag.org) or [thetrevorproject.org](http://thetrevorproject.org) for education and support.
- ✓ Counsel about using condoms and contraception.

Adolescents who identify as lesbian or gay may also have sex with members of the opposite sex, which increases the risk for unintended pregnancy.

- <sup>a</sup> = All sexually-active adolescents
- <sup>b</sup> = Sexually-active women aged ≤24; women aged ≥25 at increased risk
- <sup>c</sup> = Consider screening young adult males in high prevalence communities or settings
- <sup>d</sup> = At least annually for sexually-active MSM at sites of contact
- <sup>e</sup> = HIV-positive; at increased risk: exchange sex for drugs or money; in high prevalence communities
- <sup>f</sup> = At risk: unprotected sex, had a prior STI, share needles, family member or sexual partner infected with HBV; born in a HBV-endemic country; born to parents from a HBV-endemic country
- <sup>g</sup> = At risk: past/current injection or intranasal drug use, long-term hemodialysis, born to mother with Hepatitis C, unregulated tattoo
